

EDS Accounting Transaction Management

Maximize efficiency, reduce costs, and streamline processes for non-core business functions

Leverage established processes to reduce turnaround times and improve transaction reporting

Features

- Consulting and analysis of current business functions
- Integrating and consolidating disparate legacy systems
- Comprehensive accounts payable/accounts receivable services
- Employee expense report management
- Collection services

Benefits

- Provides valuable plan of action for improving efficiency
- Lets you choose the solution to meet your needs
- Streamlines accounting functions to reduce costs and turnaround times
- Enables you to focus on core business practices while reducing overall costs by at least 10 percent

Advantages

- Enables smooth financial transactions and cross-country business practices
- Ensures the best in systems and service through strategic relationships with Oracle, SAP, and PeopleSoft
- Reduces technical headaches associated with multiple systems as a result of mergers and acquisitions
- Enables a smooth transfer if transitioning key employees

Overview

Leverage the experience of a financial processing leader

Managing the accounting functions of your business can be difficult with aging systems and mounting volumes of paper draining valuable time and resources. We can help. Since 1968, EDS has provided administrative and financial process outsourcing to enable our clients to reduce costs and improve efficiencies.

Benefits and advantages

Streamline business functions and reduce costs

Save at least 10 percent

EDS can analyze your current processes and identify areas to reduce costs by 10 to 20 percent. For example, a \$15 billion company spending the industry average of .065 percent of its revenue on shared services could save \$97 - 195 million annually. And, with our guaranteed service levels, there may be additional savings.

Choose from flexible options

You can incorporate the entire spectrum of our global finance and accounting solution or select a few components that meet your needs. Leverage our systems integration capabilities to reduce redundancies in disparate legacy systems. Incorporate our advanced imaging, archival, and storage techniques to improve general ledger updates, invoices, database maintenance, and benchmarking.

Enhance electronic processes

Automating manual processes for accounts payable, accounts receivable, expense report management, and collections can help your business drive down costs. EDS electronic funds transfer services can streamline billing and payment functions. Incorporate our latest Web-based tools to help your organization manage accounting functions from a central location.

Leverage ERP relationships

EDS has strategic relationships with best-in-class ERP system partners Oracle, SAP, and PeopleSoft. These partnerships blend EDS' excellence in service delivery with innovative technology.

Rest easy with proactive disaster avoidance

EDS employs the industry's most sophisticated tools for planning, monitoring, and safeguarding our systems to withstand the potentially harmful effects of an accident, power failure, or natural disaster.

Experience smooth transitions

Outsourcing eliminates the time required to recruit, manage, and maintain a talented accounting team. We help key employees make a smooth transition by promoting their personal and professional development. It's why more than 80 percent of employees who join EDS through outsourcing arrangements stay with us.

Global knowledge and experience

EDS understands the complexities of multinational environments. With 120,000 employees worldwide, we know how to manage cross-cultural business practices. Our knowledge of country-specific finance laws and expertise in currency exchange enable us to operate seamless cross-country transactions.

It's Working

Furniture manufacturer saves \$1.8 million

A leading office furniture manufacturer was looking to outsource its procurement and accounts payable functions for indirect supplies and services. They wanted to reduce overall costs for indirect supplies and services and improve end-user service levels at the same time.

EDS examined the existing processes including procurement, payment, and supplier management and developed an advanced electronic solution to meet the manufacturer's needs. We designed an online catalog and leveraged EDI and electronic funds transfer capabilities for its vendor base. In just eight months, EDS implemented the online order and payment solution in more than 20 locations. The furniture manufacturer saw savings of \$1.8 million in just one year. It also consolidated its accounts payable sites from seven to one and streamlined suppliers from 3,000 to 500.
