Dear _____:

Tired of waiting for checks to clear? Want to receive funds faster? EDS can help. Our innovative new digital solution can **speed up your check-clearing process and reduce float times**.

Let me introduce you to **EDS NetDeposit® Digital Check Processing Services**. This leading-edge solution leverages digital technology and our **extensive network of processing centers** to shorten check-processing times and reduce costs. With this service, we can now do in hours what used to take days. That means improved funds availability, fewer bank fees, and lower transportation costs.

We use a special encoding system to create an image of each check and then print an image replacement document (IRD) that can be used as a legal equivalent. By electronically routing imaged checks to EDS print sites across the United States, we eliminate the need to transport physical checks out of the local area. This rapid-results solution speeds up check clearing and can help you identify fraudulent items faster.

If you'd like to learn more about how NetDeposit can help you create a bridge from traditional paper-based check processing to experience the benefits of image capabilities, visit us on the web at www.eds.com or review the enclosed brochure. **EDS is the world's second largest third-party check processing provider, processing more than four billion checks each year**. We also have four decades of experience managing financial transactions. Let us put our knowledge and background to work for your business.

I will call you to discuss how we can address your company's specific needs. If you have questions in the meantime, you can reach me at (XXX) XXX-XXXX or send me an e-mail at xxxxx.xxxxx@eds.com.

Best regards,
